

# HSIE and your 2022 HSC

Geography

# Geography

# Geography

Builds on knowledge and experiences from 7-10

Develops your interest and love of Geography

Develops your mapping and source analysis skills

Develops your research skills through the Senior Geography Project in Yr. 11

# Geography

- ▶ Through a study of geography students learn about human interaction with their environments and the impact of, and responses to, environmental change.
- ▶ As students develop an understanding of the contribution of a geographical perspective they will study the:
  - ▶ characteristics and spatial distribution of environments
  - ▶ processes that form and transform the features and patterns of the environment
  - ▶ global and local forces that impact on people, ecosystems, urban places and economic activity.
- ▶ Students learn the skills of geographical investigation and communication through a process of geographical inquiry and propose actions for a just society as active and informed citizens.
